

JOHN BOJANSKI

CLOUD ARCHITECTURE AND GLOBAL TECHNICAL LEADERSHIP

25+ years delivering enterprise infrastructure, automation, and engineering solutions. Six years at Microsoft, with director-level leadership at iQor and Jabil.

\$2M+

Annual savings from Azure-integrated automation

\$11M

Network refresh owned at Jabil

SELECTED EXPERIENCE

Microsoft | 2019 - 2025

Senior Technical Engineer - Strategic Initiatives

Architected Azure-integrated repair automation; led infrastructure design, security and compliance decisions for services supporting China, Mexico and Poland.

iQor | 2014 - 2018

Director of Technical Services

Directed global technical teams, mission-critical infrastructure, capital budgets and vendor relationships; supported AWS and Azure solutions.

Jabil | 2010 - 2014

Director of Technical Services / IT Project Manager

Built a global technical standards team and led infrastructure delivery, including the \$11M network refresh.

Deloitte | Apr - Aug 2006

Infrastructure Project Manager - Contract

Delivered infrastructure projects within the Hermitage data center PMO.

Gateway Computers | 1991 - 2001

Senior Manufacturing Engineer

Led facility startups in Japan, Malaysia, Australia, Ireland and the United States.
